PROFILE

Developer by background (TypeScript, Node.js, NestJS) moving into application security, with an enabler approach towards development teams. RNCP Level 7 degree in IT development security (expected 11/2026), on an apprenticeship at Aphilia. My goal: identify, prioritise and help fix vulnerabilities.

WORK EXPERIENCE

Aphilia — Paris | 10/2024 – 11/2026 (expected)

Backend Developer (Apprenticeship / Work-Study) · 30-person start-up, PI Electronique group

Monora Back Office: back-office platform in production (restaurant POS systems).

- Wrote Jest and Cypress (E2E) tests run in CI, with lint on every pull request; ran load tests.
- Reviewed and validated all code generated by an AI assistant (Claude Code) before merging.
- Diagnosed 50 s lock waits and HTTP 429 errors with Datadog and fixed them by optimising SQL queries.
- Built Datadog dashboards (application health, errors, API latency) and structured logs to trace incidents.
- Developed back-end features (NestJS, TypeORM, MySQL) and React components; fixed bugs.

French National Research Institute for Sustainable Development (IRD) — Paris | 03/2024 – 07/2024

Full-Stack Developer Intern

- Developed a data-collection mobile app (Flutter, Django), published on Google Play, and a Grafana dashboard; maintained the team's website.

PROJECTS

Job Application Tracker — Paris | 2026

Personal project · Design and development · github.com/andr3sEnrique/job-tracker

Private dashboard fed from Gmail (Next.js, NestJS, Prisma, PostgreSQL) that tracks each job application.

- Applied data minimisation: email bodies never stored; users can delete their account and all its data.
- Limited LLM data-leak risk: personal data masked, AI only as a second opinion, budget-capped.
- Hardened the app: per-request nonce CSP, security headers (helmet), rate limiting, Zod input validation.
- Automated tests in CI with Vitest, Testcontainers and Playwright.

IT Equipment Loan Manager — Morelos, Mexico | 09/2022 – 12/2022

Capstone project, UTEZ · Project lead of a 5-person team, client meetings · Java, Spring Boot, MySQL

EDUCATION

LiveCampus — Online | 10/2024 – 11/2026 (expected)

Master's degree: Expert en sécurité des développements informatiques (Expert in IT Development Security), RNCP Level 7 (Bac+5), apprenticeship

- Performed security audits of web applications on academic projects: DAST with OWASP ZAP and SAST with SonarQube (SQL injection, XSS, missing security headers).
- Programme: audit plan and report, risk and threat analysis (STRIDE), secure-by-design guidelines, team awareness training, secure architecture, test automation, remediation.
- Tools used in class: SonarQube, OWASP ZAP, Burp Suite, Jenkins, Wazuh, WAF, Terraform (IaC), Kubernetes, CI/CD, Linux scripting and administration.

Université d'Orléans — Orléans | 09/2023 – 07/2024

BUT Computer Science, 3rd year (exchange, after two years at UTEZ, Mexico)

Emiliano Zapata Technological University (UTEZ) — Morelos, Mexico | 09/2021 – 07/2023

University Technician Degree in Multiplatform Software Development

SKILLS

Application security: OWASP Top 10, STRIDE threat modeling (training), SAST (SonarQube), DAST (OWASP ZAP, Burp Suite – training), security headers, CSP, secure code review, input validation, rate limiting

DevSecOps / CI-CD: GitHub Actions, Jenkins (training), automated tests and lint in CI, Docker, Git

Observability: Datadog, Grafana

Languages & scripting: TypeScript, JavaScript, Python (Django), Java, Linux scripting (training)

Backend / Frontend: Node.js, NestJS, Express, MySQL, PostgreSQL, React, Next.js

LANGUAGES

Spanish: native | French: B2 | English: B1+
