

Andres Enrique Ortiz

Full-Stack Developer (Node.js / TypeScript) | Available from mid-January 2027 | Permanent or fixed-term

Bondy (93), France | +33 7 49 48 11 59 | enrique.ortizsc@gmail.com

andr3senrique.github.io/my-portfolio | github.com/andr3sEnrique | linkedin.com/in/enrique-ortizsc

PROFILE

Backend-focused developer (TypeScript, Node.js, NestJS, React) on an apprenticeship at Aphilia, working on Monora, PI Electronique's back-office platform for restaurant POS systems. Trained in secure development (RNCP Level 7).

Autonomous and adaptable, having studied in Mexico and France.

WORK EXPERIENCE

Aphilia — Paris | 10/2024 – 11/2026 (expected)

Backend Developer (Apprenticeship / Work-Study) · 30-person start-up, PI Electronique group

Monora Back Office: reporting and administration for PI Electronique (French leader in restaurant POS systems).

- Developed features across the stack, mostly back-end (NestJS, TypeORM, MySQL), for menu and item management, with some React front-end work.
- Cut p50 latency of listing endpoints by 18% (replaced to-many joins with a batch query) and fixed 50 s lock waits and HTTP 429 errors found with Datadog by optimising SQL queries.
- Built Datadog dashboards (application health, API latency, sync success/failure KPI) and structured logs to trace terminal sync issues.
- Wrote Jest and Cypress tests run in CI, ran load tests, and used Claude Code daily, reviewing and validating all generated code before merging.

French National Research Institute for Sustainable Development (IRD) — Paris | 03/2024 – 07/2024

Full-Stack Developer Intern

- Developed a data-collection mobile app (Flutter, Django), published on Google Play, and a Grafana dashboard; maintained the team's website.

PROJECTS

Job Application Tracker — Paris | 2026

Personal project · Design and development · github.com/andr3sEnrique/job-tracker

Private dashboard fed from Gmail that tracks the history of each job application.

- Built a monorepo (Next.js, NestJS, Prisma, PostgreSQL) that syncs Gmail and classifies recruitment emails with prioritised rules and an optional, budget-capped AI fallback (Claude Haiku / Ollama).
- Designed for privacy and security: no message bodies stored, personal data redacted before any AI call, CSP, rate limiting and input validation.
- Tested with Vitest, Testcontainers and Playwright in CI; deployed on Vercel, Render and Neon.

GABOR45 — Orléans | 09/2023 – 01/2024

Frontend Developer · Tutored project, Université d'Orléans · github.com/MaxRonce/GABOR45

Mobile app for organic farmers: authentication, events and search modules (Ionic React, Supabase).

IT Equipment Loan Manager — Morelos, Mexico | 09/2022 – 12/2022

Capstone project, UTEZ · Project lead of a 5-person team · Java, Spring Boot, MySQL

EDUCATION

LiveCampus — Online | 10/2024 – 11/2026 (expected)

Master's degree: Expert en sécurité des développements informatiques (Expert in IT Development Security), RNCP Level 7 (Bac+5), apprenticeship

- Performed security audits with OWASP ZAP and SonarQube on academic projects (SQL injection, XSS, missing security headers).

Université d'Orléans — Orléans | 09/2023 – 07/2024

BUT Computer Science, 3rd year (exchange, after two years at UTEZ, Mexico)

Emiliano Zapata Technological University (UTEZ) — Morelos, Mexico | 09/2021 – 07/2023

University Technician Degree in Multiplatform Software Development

SKILLS

Backend: TypeScript, JavaScript, Node.js, NestJS, Express, Django, MySQL, PostgreSQL, Prisma, TypeORM

Frontend & testing: React, Next.js, Ionic React, Flutter, Jest, Vitest, Cypress

DevOps & observability: Docker, Git, GitHub Actions, GCP (Cloud Storage, Pub/Sub), Datadog, Grafana

Security (academic projects): SonarQube, OWASP ZAP
