EDUCATION

2024 - 2026
LIVECAMPUS

- Master's Degree – Expert in IT Development Security

2023 - 2024
UNIVERSITÉ D'ORLÉANS

- Application development: design, development, and validation.

SKILLS

- Full-Stack Development: TypeScript, JavaScript, Node.js, React, NestJS, Express, Ionic React
- Databases: MySQL, PostgreSQL, Redis, Supabase, TypeORM
- Artificial Intelligence: Agent integration, skill and rule design, specialized prompts
- DevOps & Observability: Docker, Git, GitHub Actions, Datadog
- Cybersecurity: SonarQube, OWASP ZAP

LANGUAGES

- Spanish: Native language
- French: B2
- English: B1 (intermediate)

PROFILE

Backend-focused full-stack developer with a master's degree in IT security and two years of work-study experience at Aphilia. Passionate about software engineering, AI architectures, and cybersecurity, I design and develop applications and microservices in a TypeScript/Node.js environment. I am **self-motivated, adaptable, and comfortable working with new technologies**, and I can contribute to various aspects of a project, from backend and frontend development to service integration, observability, and deployment.

WORK EXPERIENCE

- APHILIA** 10/24 - 11/26
Backend Developer (Work-Study Program)
 - Backend Development: Design and implementation of REST APIs and modular microservices using NestJS, Express, and Node.js.
 - Data Management: MySQL, Redis, and TypeORM.
 - AI Integration: Design and integration of conversational agents and intelligent assistants (definition of skills, rule engine, and specialized prompts).
 - Monitoring & Observability: Application performance monitoring, dashboard configuration, and metrics management with Datadog
- Institut de recherche (IRD)** 03/24 - 07/2024
Internship | Full-Stack Web Developer
 - Développement d'une application de collecte de données et d'un tableau de bord de visualisation des données : Flutter et Django.
 - Maintenance corrective et évolutive du site web de l'équipe de recherche.
 - Assistance au responsable informatique de l'équipe.
- Association GABOR45** 09/23 - 01/24
Mentored Project | Full-Stack Web Developer
 - Development of a mobile app to create search features for farmers: Ionic React, Supabase.
 - Contributed to the development of the authentication, farmers, events, and categories modules.
